Software Developer & Technical Project Lead with 10+ years delivering complex client-facing systems end-to-end (requirements → architecture → implementation → deployment → support). Recognized for strong analytical and structured problem-solving capabilities. Analytical reasoning formally assessed through the Wechsler Adult Intelligence Scale (WAIS-III), with performance in the Very Superior range (138). Seeking remote contract or part-time roles in backend/full-stack development, technical coordination, and complex system maintenance.

Work Experience

09/2016 - Present
(8 months remotely)

Project Manager / Software Developer

Webner Technology - Brazil

Responsibilities:

- Act as the primary contact for clients, conducting regular meetings with CEOs, managers, and stakeholders to gather and analyse business needs. Provide comprehensive technical support, addressing and resolving complex issues promptly to maintain client satisfaction.
- Manage and lead end-to-end software development projects while contributing as a developer. Balance coding, design, and implementation tasks to ensure timely delivery and alignment with requirements.
- Translate business requirements into detailed project plans and actionable tasks for the development team. Oversee the deployment of the software, ensuring high standards of quality and functionality.

Technologies:

- Back-end: Groovy on Grails, Spring, Java, NodeJS, Ionic.
- Front-end: GSP, HTML, CSS, JavaScript, jQuery, Bootstrap.
- Databases: PostgreSQL, MySQL, SQL Server.
- Tools and Skills: Git, Docker, AWS, JasperReports, Excel, Google Docs.

05/2012 - 09/2016

MS-DOS/Desktop Software Developer

Crítérius Software - Brazil

Responsibilities:

- Developed DOS and Desktop Applications for various projects.
- Engineered Embedded Systems for CipherLab Mobile Computers.
- Designed and encoded thermal labels.
- Automated tasks through the creation of scripts, improving workflow efficiency.
- Communicated with clients to gather requirements and ensure client satisfaction.
- Created and executed project work plans, adapting as necessary to meet changing needs and requirements.
- Engaged proactively in Scrum ceremonies, collaborating with cross-functional teams to assess the scope of work and optimize project outcomes through comprehensive and in-depth requirement analysis, while also offering valuable insights and ideas to enhance the development strategy.

Technologies:

- Programming Languages: xBase, xHarbour, CA-Clipper, Xailer, Delphi, C.
- Thermal Label Printing: Zebra ZPL II, Argox PPLA.
- Databases: Oracle XE, dBase III.
- Project Management: Redmine, Jenkins, TortoiseSVN.

03/2010 - 05/2012

IT Instructor

MicroWay Informatica - Brazil

Responsibilities:

- Provided guidance and assistance to students, addressing their inquiries and resolving doubts.
- Conducted the grading and assessment of exams and assignments.
- Prepared comprehensive reports detailing students' progress.
- Conducted analysis of students' academic and behavioral development.
- When necessary, communicated with parents to discuss students' progress.

Technologies:
